

Australian Immunisation Register (AIR)

Integration Enhancements - February 2025

Significant updates have been made to the MedAdvisor for Pharmacy integration with the [Australian Immunisation Register \(AIR\)](#) in preparation for the 2025 flu vaccination season. These enhancements will ensure pharmacies are adequately prepared and are empowered to offer an optimum patient vaccination experience.

Please see below the enhancements your pharmacy can expect:

Improved visibility of patient immunisation information

Pharmacists will have easy access to expanded patient immunisation data inclusive of:

- List of vaccinations due for patient
- Patient's natural immunity history
- Patient's history of vaccine trial participation

Information extracted from AIR will be displayed within the immunisation form in MedAdvisor for Pharmacy creating a more streamlined clinical recording workflow.

Find patients directly from AIR

Pharmacies will now be able to search for a patient on AIR and create a new patient record within MedAdvisor for Pharmacy without needing to access their dispense system.

Australia's leading pharmacy clinical services solution:

+4 mil

digitally connected patients

>9.5 mil

services delivered in pharmacy

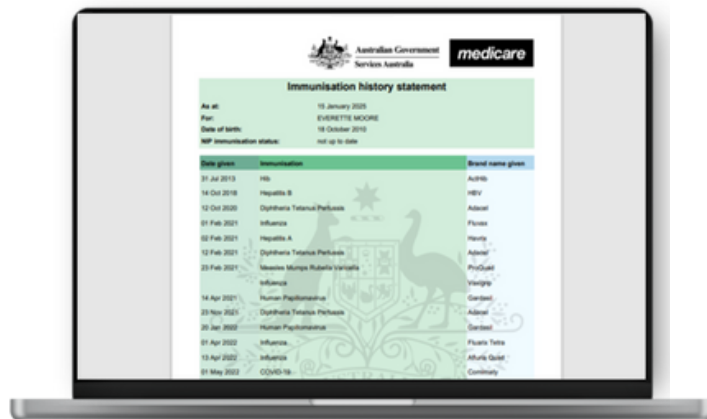

82%

vaccinations completed in pharmacy recorded using MedAdvisor.

Download, Print and Email Patient Immunisation History

Offer a more comprehensive vaccination service in pharmacy by:

- Easily **downloading a patient's AIR record** straight from the immunisation form in MedAdvisor for Pharmacy.
- Printing immunisation records for patients at the end of a service or alternatively **sending a digital record via email** directly from the immunisation form.
